

"To prevent and alleviate human suffering, wherever it is found"

(International Red Cross Mission)

If an organization's first aid risk analysis shows that there are no specific risks that require the obligation of a first aid worker or if the organization has fewer than 20 employees or a lot of work is being done on the move, one or more customized initiation course will offer a good solution.

It is often helpful to train different employees within the organization to deal with unforeseen emergencies. We offer a customized initiation course as a workshop that trains the employees involved with a pragmatic approach. These sessions are organized in such a way that they also serve perfectly as an annual refreshment for first aid workers or are part of a safety day or other initiative.

The following subjects can be discussed:

- Emergency approach
- CPR & AED
- First aid for urgent life-threatening situations (stroke, heart attack, burns, bleeding ...)
- Care of skin wounds and sprains
- Items tailored to the organization

	Dutch
	Persons designated by the employer, first responders, interested parties All members of staff who can assist others in an emergency by administering primary care
	Date to be determined
	½ day (4 hrs)
	Place to be determined
