

"The Asbestos Plague, the bad apple in the construction basket" (TDB)

The effects that asbestos can have on the health of workers who come into contact with materials containing asbestos needs to be taken very seriously. The training as referred in the Codex on the welfare Book 6 Title 3 is aimed, among other things, at all employees who carry out demolition work to a limited extent and can therefore come into contact with asbestos sporadically or regularly. Part of the training focuses on the removal of asbestos according to the "simple action".

After the training you will receive a certificate "Asbestos removal simple actions". This certificate is valid for 1 year. In order to stay in line with the regulations, you need to train for 8 hours every year in asbestos removal and relevant subjects.

The content of this training:

- Legislation and responsibilities: Properties of asbestos and health risks when exposed
- Types of products that may contain asbestos
- Actions that can lead to exposure
- Safe working methods and measurement techniques: Health surveillance, Prevention, PPE and risk assessment, First aid, emergency and decontamination procedures
- Specific rules and techniques for: the use of PPE, emergency and decontamination procedures for demolition and removal work, the treatment and disposal of asbestos waste

After the training "Asbestos removal simple actions" you can start as a worker in the construction sector with the remediation and removal of asbestos.
